

# Matti Jokitalppo

Software Engineer

## about

Espoo,  
Finland

melonmanchan@gmail.com  
<https://mattij.com>  
[github.com/melonmanchan](https://github.com/melonmanchan)

## languages

native: finnish  
fluent: english  
intermediate:  
swedish

## technology

JavaScript  
Golang  
Ruby/Rails  
Node.js  
React  
Angular  
Vue  
HTML5  
CSS3  
Sass  
Android  
Java  
GNU/Linux  
Docker  
Python  
PHP

## interests

electronics, games & game programming, embedded programming, robotics, linux, open source software, web development, music, mechanical keyboards, text editors

## education

2016 -	<b>Master's Programme in Computer Science</b> Software Systems and Technologies study track	Aalto University
2012 - 2015	<b>Degree in Software Engineering</b>	JAMK University of Applied Sciences
2011	<b>Finnish Matriculation Examination</b>	Koulutuskeskus Salpaus, Nastola

## experience

11 2015 - 04 2017	<b>Aalto University Learning Environments research group</b> <i>Developing mobile and web applications and augmented reality solutions</i>	Developer
2014 - 03 2017	<b>Nestronite OY, Jyväskylä</b> <i>Designing and developing Jaxber, a multi-platform mobile application for collecting customer feedback.</i>	Developer
04 - 07 2015	<b>N4S@JAMK, Jyväskylä</b> <i>Developing Contriboard, a modern web app for team collaboration.</i>	Developer
04 - 07 2014	<b>N4S@JAMK, Jyväskylä</b> <i>Converting Tieto TOAS JavaEE framework packages from CentOS/RHEL Linux to Ubuntu.</i>	Junior developer

## applications

2016	<b>Ach so!</b> Android/iOS app for recording and sharing insights via annotated videos. Java/Golang/Python/Ruby	<a href="http://achso.aalto.fi">http://achso.aalto.fi</a>
2015	<b>Soar</b> Hybrid app for real-time peer-to-peer video calls and vision sharing with WebRTC. Made with Cordova/Angular/Ionic/Sass/HTML5	<a href="https://github.com/melonmanchan/sardroid">https://github.com/melonmanchan/sardroid</a>
2015	<b>Contriboard</b> Single page app for real-time collaboration, developed with React/NodeJS/Express/MongoDB.	<a href="http://n4sjamk.github.io/contriboard">http://n4sjamk.github.io/contriboard</a>
2015	<b>Android robot</b> Arduino-powered robot that's controlled over Bluetooth LE via an Android app, made as my thesis project for JAMK. C++/Java.	<a href="https://github.com/melonmanchan/Android-Robot-V2">https://github.com/melonmanchan/Android-Robot-V2</a>
2014	<b>Jaxber</b> Multi-platform mobile application for collecting customer feedback, developed with HTML5/JavaScript/LESS utilizing PhoneGap framework. Also created management panel with Node.js/Express/Sass/Handlebars.js.	<a href="http://jaxber.com">http://jaxber.com</a>
